

Remote learning with Snappet

Creating student login credentials

In order for students to sign in at home, you have to create student login credentials. Students are then able to sign in at home on a tablet, a computer or on a smartphone. Please take the following steps to create login credentials for your students:

1. Sign in to your own dashboard (<https://teacher.snappet.org>).
2. Click on your class name at the right top corner, go to 'Settings' and then select 'Students'.
3. Click on 'Edit Student'.
4. Fill in a username and a password for that student.
5. Click on 'Save changes'.
6. Send the usernames and passwords to the parents of your students.

With help from their parent/caretaker, students are now able to sign in at home on any device. They have to take the following steps to do so:

1. Access a browser (e.g. Google Chrome).
2. Go to <https://student.snappet.org>.
3. Fill in the login credentials you have sent to them.

Add your curriculum

When you log on to your dashboard for the first time, you first need to activate your subject for your class. To activate your first subject, you need to click on **Add** at the top left of your screen. In the window that appears next, you need to take the following steps:

- Step 1 Select the right subject and click on 'Next'
- Step 2 Select the right grade for your group and click on 'Next'
- Step 3 Select the right curriculum (textbook you wish to follow)
- Step 4 Select which students should see this subject. Select 'A custom group of students' if not all students in your class should follow this curriculum. Click on 'Activate subject'.

The screenshot shows the snappet dashboard with the following interface elements:

- Top Bar:** Includes a 'No Subjects' button with an 'Add +' icon, and icons for Teach, Monitor, Review, Class Lieke (Grade 2), and a search icon.
- Middle Section:** A large text box with the heading "Add your first subject to start teaching" and a cartoon illustration of three children.
- Activation Step:** A box with the text "Which subject do you want to activate?" and a dropdown menu showing "Math" with a calculator icon. The dropdown has a "v" icon for more options.
- Bottom Navigation:** A progress bar with steps 1, 2, 3, and 4, where step 1 is highlighted in blue. A red "Next" button is located to the right of the progress bar.

Once you have activated a subject, go to **Teach** in your navigation bar at the top. In this page you will find all your lessons in one accessible overview. This lesson plan is completely aligned to your own curriculum. Each lesson from your book can easily be found in this lesson plan.

If you click on one of the chapters or modules, the lessons for that specific chapter or module will open up in one simple overview. For each lesson you will immediately see which learning objective will be covered. Click on the lesson you are going to teach to see the details of that lesson.

To send a lesson to all your students, click on the three vertically aligned dots and click on the option 'Send to class'. Your students are now able to find this lesson in their student app at 'Received lessons'.

The screenshot shows the 'Topic 7' overview in the snappet Teach interface. It displays three lessons: Lesson 7-1, Lesson 7-2, and Lesson 7-3. Each lesson card includes a preview image, the lesson title, a brief description, and a 'Send to class' button. The 'Send to class' button for Lesson 7-1 is circled in red.

The screenshot shows the 'Received' tab in the snappet Student app. It lists three lessons: Lesson 7-3, Lesson 7-2, and Lesson 7-1. Each lesson card includes a preview image, the lesson title, a brief description, and a 'New' button.

Monitoring your students

As soon as your students have been worked on a lesson, you are able to monitor their work and progress. Click on the monitoring button at a lesson in [Teach](#).

You will immediately see which students are making a lot of mistakes (red bubbles) and which students are doing well (green bubbles). When students correct their mistake, you will see green bubble with a red stripe at the bottom.

After finishing set 1, set 2 and (optionally) set 3, all your students are able to continue practicing in the *Plus* set. This is where your students continue practicing with exercises adapted to their own level.

The image shows a digital learning platform interface. At the top, there is a navigation bar with a back arrow, the word 'Lessons' in a large white font, and a magnifying glass icon. Below the navigation bar, the word 'Received' is displayed in blue text. To the right, there is a 'Lesson Plan' link. The main content area is titled 'Lesson 7-3' and features a small icon of a train with the numbers 46 and 33. Below the title, the text 'We will solve addition and subtraction word problems' is shown. To the right of this text is a green button with the word 'New' and an upward arrow icon. The 'Instruction' section is labeled 'Set 1' and contains five numbered items: 1, 1a, 1b, 1c, and 1d. The 'Practice' section is labeled 'Set 2' and contains ten numbered items: 2a through 2j. The 'Small Group Instruction' section is labeled 'Set 3' and contains ten numbered items: 3a through 3j. At the bottom left, there is a blue circle with a white plus sign and the text 'Continue Adaptively'. To the right of this, the text 'Solve addition and subtraction word problems #120' is displayed.

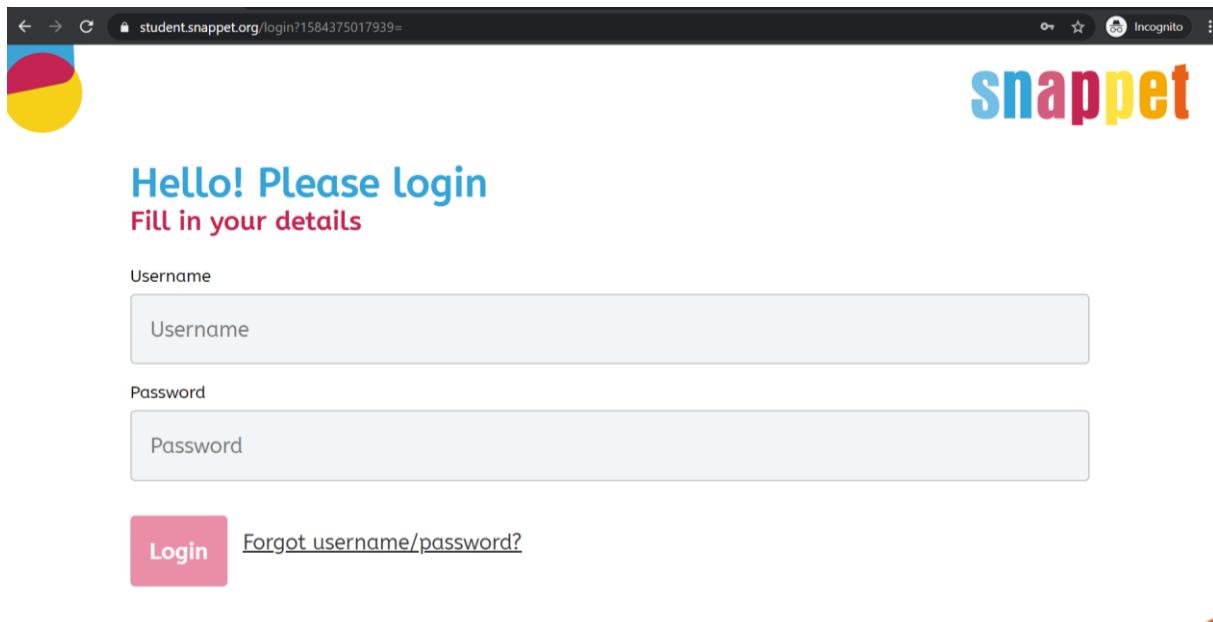

Working with Snappet at home – Students/parents

Signing in

To work with Snappet, your child needs a tablet, (laptop) computer or a smartphone which is connected to the internet. Please take the following steps to sign in to the online Snappet environment:

1. Open a browser (e.g. Google Chrome) and go to <https://student.snappet.org>
2. Fill in the login credentials your child's teacher has sent you.
3. Click on 'Login'

A screenshot of a web browser showing the Snappet login page. The address bar at the top shows the URL "student.snappet.org/login?1584375017939=". The page features a large "snappet" logo at the top right. The main content area has a yellow and blue circular graphic on the left. The text "Hello! Please login" is displayed in blue, followed by "Fill in your details" in red. There are two input fields: one for "Username" and one for "Password", both with placeholder text "Username" and "Password" respectively. Below the fields is a pink "Login" button and a link "Forgot username/password?".
